OBSTETRICS & GYNECOLOGY
NEW PATIENT INFORMATION

Welcome to our office! We thank you for selecting us to serve your healthcare needs. So that we may all enjoy a smooth working relationship please take a few minutes to read the following information. If you have any questions, we will be happy to answer them.

1. If you do not have insurance **payment** is required at the time of service. For patients with insurance co-pays, co-insurance and/or deductibles are required prior to office visit, delivery or surgery. Payment plans are available upon request.

2. It is necessary for you to bring your **insurance** card and Identification to all visits. If your treatment is not covered by your insurance company, all charges for treatment will be your responsibility. It will be your responsibility to notify us if your insurance changes or terminates as soon as possible. When possible learn what you can about your insurance benefits prior to making an appointment. This will keep you from being surprised later.

3. We will bill your **insurance** as a courtesy and make every effort to get payment directly from your insurance company. If your insurance has not paid 60 days after treatment, it may be necessary for us to treat your account as a cash account. If it is not possible, for us to be paid for our service after 120 days your account will be sent to a collection agency. In the event this happens your account will begin accruing interest. There may also be a collection fee or attorneys costs added to your account.

4. In most cases cultures, specimens and/or blood work are sent out to LabCorp. The **laboratory** will send you a separate bill and this office cannot take responsibility for your laboratory bill. If your insurance requires you to go to another laboratory, please remind lab personnel each time you visit our office.

5. It may be necessary for this office to **release** your information to your insurance company to obtain payment and/or hospital for treatment. I authorize all payment to be made to Timothy Sauter, MD Ltd or Legacy Women's Health.

6. We will do our best to keep your **waiting** to a minimum. However, the nature of the business requires our providers to go to the hospital on short notice. If this happens we will do our best to accommodate you. This may make your wait longer, make it necessary to reschedule or see one of our other providers.

7. A parent or guardian needs to accompany a **minor** to authorize treatment and take financial responsibility.

8. All **prescription** refills require two business days to refill. We request that refill requests are faxed to our office by your pharmacy. Please understand some refills will require an office visit.

9. In the event of a **returned check** there will be a fee of $25.00 and thereafter you will be required to pay by either cash or credit.

10. Please make every effort to give us 24 hours notice if it is necessary for you to **cancel or reschedule.** We reserve the right to charge a fee of $25.00 for missed appointments. It may be necessary for us to refuse service to you if you have a past due balance as part of your account history with us.

I have read and understand the Financial Policy and Office Procedures

PATIENT CONSENT FOR USE AND DISCLOSURE OF PROTECTED HEALTH INFORMATION

With my consent, Timothy Sauter, M.D. Ltd DBA Legacy Women's Health may use and disclose protected Health information (PHI) about me to carry out treatment, payment and healthcare operations (TPO). Please refer to Timothy Sauter, M.D. Ltd's Notice of Privacy Practices for a more complete description of such uses and disclosures.

I have the right to review the Notice of Privacy Practices prior to signing this consent. Timothy Sauter, M.D. Ltd reserves the right to revise its Notice of Privacy Practices at anytime. A revised Notice of Privacy Practices may be obtained by forwarding a written request to Timothy Sauter, M.D. Ltd's Privacy Officer at 8480 S. Eastern, Suite F Las Vegas, NV 89123.

With my consent, Timothy Sauter, M.D. Ltd's staff may call my home or other designated location and leave a message on voice mail or in person in reference to any items that assist the practice in carrying out TPO, such as appointment reminders, insurance items and any call pertaining to my clinical care, including laboratory results among others.

With my consent, Timothy Sauter, M.D. Ltd's staff may mail to my home or other designated location any items that assist the practice in carrying out TPO, such as appointment reminder cards and patient statements.

With my consent, Timothy Sauter, M.D. Ltd's staff may e-mail to my home or other designated location any items that assist the practice in carrying out TPO, such as appointment reminder cards and patient statements. I have the right to request that Timothy Sauter, M.D. Ltd restrict how it uses or discloses my PHI to carry out TPO.

However, the practice is not required to agree to my requested restrictions, but if it does, it is bound by this agreement. By signing this form, I am consenting to Timothy Sauter, M.D. Ltd's use and disclosure of my PHI to carry out TPO. I may revoke my consent in writing except to the extent that the practice has already made disclosures in reliance upon my prior consent. If I do not sign this consent, Timothy Sauter, M.D. Ltd may decline to provide treatment to me.

First Trimester Screening

Welcome to our practice. We are glad you have chosen our practice for your obstetric care. We are happy to report the majority of babies are born healthy. However, if you have concerns there are screenings available to determine your baby's risk for some genetic defects. Unfortunately, these screenings can be costly and many insurance plans do not cover them. Your health care provider will explain your genetic testing options more extensively at your appointment and in most cases you will have time to determine what is right for you and your baby.

However, the **Nuchal Translucency Screening** is a **First Trimester Screening** only. Because this screening is **time sensitive** it is necessary for us to help you understand a little about what this is before your first visit to our office, for this pregnancy. The **First Trimester Screening** specifically determines your baby's risk factor for **Down syndrome**. This screening must be done between **11 and 13 ½ weeks**. Through the use of this **First Trimester Screening** approximately 90% of Down syndrome cases are detected. This is a two part test which includes a blood test and an ultrasound. If you are interested in having the **First Trimester Screening** done, you will need to make the appointment for the ultrasound and have this done prior to 13 weeks gestational age. If you are interested in this screening and your first office visit for this pregnancy will be after this time, please contact us.

I understand that the Nuchal Translucency Screening is time sensitive and is optional. I also understand it may not be covered by insurance and that this office is unable to provide the cost of the lab portion of this screening. All billing inquiries regarding the lab work performed in conjunction with the ultrasound should be directed to the appropriate laboratory. If you need more information regarding your financial obligation, please contact your insurance company.

Understanding What it Means to be a "Carrier"

Questions you may have if your Universal Genetic Test results show that you are a carrier of a recessive disease.

What is a recessive disease?

Recessive diseases are caused by changes (or mutations) in a person's genes. Every person has two copies of all of their genes, one inherited from the mother and one from the father. A recessive disease occurs when **both** copies of a gene pair have a mutation.

What is a carrier?

A carrier is someone who has one copy of a gene pair with a mutation. The other gene copy in the pair is normal. Typically, carriers are healthy individuals and do not need any special medical care. For a brief educational video, visit https://www.counsyl.com/howto/intro/

What disease am I a carrier for?

Your healthcare provider can provide you with your Universal Genetic Test report. The report will tell you which disease you carry and also provide a brief description of that disease.

What is the chance that my baby will have the disease for which I am a carrier?

The chance that your baby will be affected depends on whether your partner is a carrier for the **same** recessive disease. The chance that you and your partner are carriers of the same recessive disease gene is under 1%.

What if my partner is a carrier for the same disease?

If both you and your partner are carriers for the same disease, your child has a 1 in 4 (25%) chance of having that disease. If you and your partner are carriers for the same genetic disease, you will have the opportunity to speak with your physician or a genetic counselor about the medical options available to you.

What if my partner's test result is negative? Can he still be a carrier?

Even with a negative test result, there is still a small chance that your partner could be a carrier. This is true of any screening test. Your health care provider or genetic counselor can calculate the exact risk of having an affected child if your partner tests negative.

How can I get more information?

If you have further questions about your results, or the next steps to take, Counsyl offers free genetic counseling by board certified genetic counselors. Please call 1-888-COUNSYL or visit www.counsyl.com/appointments.

CARRIER SCREENING FOR GENETIC DISEASES

The goal of our practice is to make sure that you receive optimal care and attention to improve your chances of having a healthy pregnancy, and of course, a healthy child.

An important part of family planning is being informed about your testing options. One of these options is genetic carrier screening. Carrier screening can help you understand your risk of having a child with a genetic disease.

Typically carriers are healthy individuals; but when two parents are carriers of the same genetic disease they can have a child affected with the disease. Most people do not know they are carriers until they have a child born with the disease.

The Universal Genetic Test screens for diseases such as Cystic Fibrosis, Tay-Sachs disease, and Sickle Cell disease. Some genetic diseases can significantly impair a child's normal development. For some of these conditions, early treatment can improve pregnancy outcomes. Your doctor can provide you with the full list of tested diseases.

If both you and your partner are carriers for the same disease, your child has a 1 in 4 (25%) chance of having that disease. If you are found to have a high reproductive risk, you have options. You may decide to have preimplantation genetic diagnosis, a prepregnancy process that significantly reduces the risk that a child will inherit the genetic disease, or undergo testing during your pregnancy to make informed reproductive decisions. Some individuals consider adoption or opt to not have children. Even if you would not choose any of these options, you can use the information to prepare for the birth of a child with a genetic disorder. You will have the opportunity to speak with your physician or a genetic counselor about the medical options available to you.

Like any carrier screening test, some carriers will not be detected, so this test can reduce, but not eliminate the chance for a genetic disease.

The Universal Genetic Test is covered by most insurance policies. The test results will be sent to your doctor in about two weeks and you will be notified shortly thereafter.

Genetic testing is performed through Counsyl. Counsyl's billing policy is as follows:
Patients with commercial insurance: For all patients with insurance, the Counsyl test will have a maximum out of pocket cost of $99.00, but no patient with insurance will ever pay more than $99.00.
Patients without commercial insurance: The Counsyl test costs $349.00 and includes all disease screenings ordered by your physician. It is payable by credit card.

Please contact Counsyl directly regarding invoices at **(888) COUNSYL** or by email at **support@Counsyl.com**.

Please sign this form and feel free to ask your doctor if you have any further questions.

_____My partner and I are both interested in the Universal Genetic Test.

_____I am interested in the Universal Genetic Test.

_____I am declining genetic carrier screening for the Universal Genetic Test.
